

**AMENDMENTS TO THE SPECIFICATION:**

Please REPLACE paragraph [077] on page 17 of the Specification with the following amended paragraph:

[077] For instance as an output parameter resolution may be chosen, if such chosen resolution is a well defined resolution (number of pixels per unit area), this may be defined independent of the chosen printing engine. However the output resolution parameter may also be "highest resolution". Just what "highest resolution" is may be dependent on the chosen printing engine, which makes the output parameter dependent on the printing engine parameters.
